Session 3

Group projects are only awesome when everyone is on the same page and connected. Don't waste time planning and scheduling, spend more time getting to business.
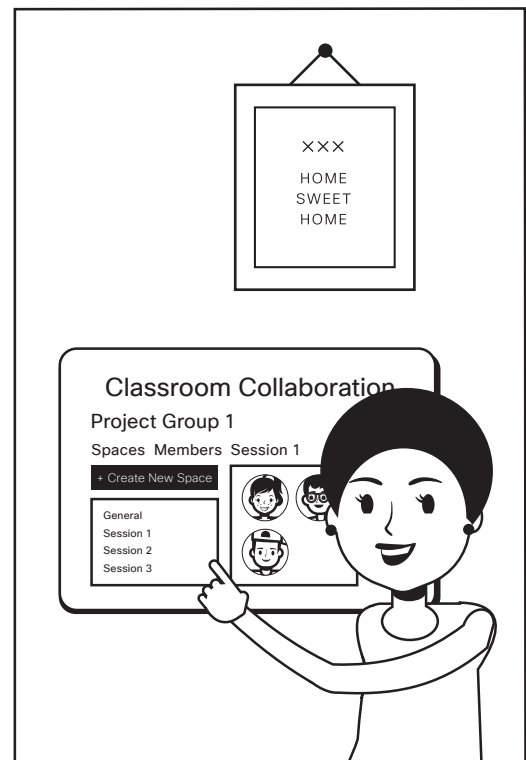

1.   Chat with your group:

Use Webex Teams chat to throw around ideas, ask questions, and work out the next steps of your project together.

2.   Don't be afraid to share:

Share files to the group, upload photo's straight from your phone to help show what you're thinking.

3.   Brainstorm together:

Use the Whiteboard during a Webex to brainstorm together. Everyone in the meeting can draw and sketch all at the same time. The whiteboards get saved in your Space for later reference.

4.   Meet from anywhere:

Schedule a Webex meeting for the group so everyone gets alerted before it starts. Need an impromptu get together? Send a message to the group and ask if anyone is free for a chat, then hit the Meet button in Webex Teams, to start an instant video call.

PRO TIP

Use GIFs to add a bit of humour in your conversations.

Play to everyone's strengths, don't be afraid to ask questions and learn by sharing.
Do it all in Webex Teams.
